HOSPITAL  
Acibadem Kozyatagi Hospital, İstanbul

DEPARTMENT  
Emergency Service

## CLINICAL FOCUS

Emergency interventions form one of the two main areas of Dr. Bilal's work. In an emergency service, patients arrive with a wide range of symptoms and levels of urgency, and the physician's role is to take a focused history, examine the patient, decide which investigations are needed and begin initial management.

Trauma care is the second area of focus. Trauma refers to injuries caused by external events such as falls, road accidents or other physical impacts. Care in this setting concentrates on early assessment of the injured patient, identification of the injuries present, stabilization where required and planning of further evaluation or treatment. Emergency interventions

Trauma care

## INTERNATIONAL PATIENTS

Dr. Bilal speaks Turkish and English. For patients coming from abroad, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
