DEPARTMENT
Cardiology Department

CLINICAL FOCUS

Dr. Ouzoun's clinical work is in cardiology, the medical specialty concerned with the heart and circulation. In a cardiology department this generally involves taking a detailed history of a patient's symptoms, examining the patient, reviewing existing test results and previous treatments, and discussing which further steps, if any, may be appropriate.

The specific conditions and procedures that Dr. Ouzoun handles are not set out in her record on this page. Whether a particular test, medication or intervention is suitable for an individual patient can only be decided after a clinical assessment, and any recommendation is made on the basis of that patient's history, findings and previous treatment.

INTERNATIONAL PATIENTS

Dr. Ouzoun consults in Turkish and English, so patients traveling from abroad who speak either language can communicate with her directly; interpreters can be arranged for other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results,...
