İstanbul

DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

A central part of Dr. Fettahzade's practice is dental implants, including All-on-Four and All-on-Six treatment, in which a full arch of teeth is supported on four or six implants. Bone grafting may form part of implant planning when it is clinically indicated.

Dr. Fettahzade additionally treats trismus (jaw locking) and offers teeth grinding treatment. Depending on the clinical picture, approaches to teeth grinding may include Botox for teeth grinding or night guard application.

Dental implants

Tooth extraction
