Acibadem Kent Hospital (Izmir)

DEPARTMENT

Neurology

CLINICAL FOCUS

Dr. Gökben's practice is focused on pediatric neurology, the field concerned with disorders of the brain, spinal cord, nerves and muscles as they present in infants, children and adolescents. Her approach begins with a careful history taken from the child and the family, a review of the child's development and any previous findings, and a neurological examination adapted to...

Because neurological conditions in childhood can change over time and may involve several medical disciplines, Dr. Gökben's evaluations are intended to clarify the current situation, to consider whether further investigations are needed and to discuss with the family the options that are appropriate for the individual child.

Epilepsy in children

Febrile seizures

Childhood headache and migraine

Cerebral palsy

Developmental delay assessment

INTERNATIONAL PATIENTS

Families coming from abroad are supported by the international patient team, which coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, arranges appointments and organizes the hospital visit in Izmir.

CONDITIONS TREATED

Epilepsy in children

Febrile seizures

Childhood headache and migraine
