CLINICAL FOCUS

Dr. Özcan evaluates and treats women with a range of gynecological conditions. His areas of expertise include endometriosis treatment, pelvic pain and dysfunction, painful intercourse (dyspareunia), and sexually transmitted diseases. He also sees patients with urinary incontinence and other bladder health concerns.

On the surgical side, Dr. Özcan performs robotic surgery and hysterectomy. His practice also includes vNOTES scarless surgery (vaginal laparoscopy), a technique in which the operation is carried out through the vagina rather than through abdominal incisions, as well as vaginal tightening and cesarean delivery.
