CLINICAL FOCUS

Dr. Karaküçük evaluates and manages a broad range of adult and paediatric eye conditions. His areas of expertise include refractive errors such as myopia, astigmatism and hyperopia, as well as amblyopia and other paediatric eye diseases.

His practice further covers surface and eyelid conditions, including conjunctivitis, blepharitis, eye allergies and eyelid twitching (myokymia), together with visual symptoms such as ocular migraine. The appropriate approach in each case depends on the findings of the clinical examination and the patient's individual history.
