CLINICAL FOCUS

Dr. Doğan's work centers on imaging of the nervous system and on interventional neuroradiology. Her diagnostic practice is built around computed tomography and magnetic resonance imaging, and she also has a professional interest in virtual angiography, a non-invasive imaging approach to visualizing blood vessels.

She has co-authored peer-reviewed publications on the topographic evaluation of thalamic and bithalamic infarctions on diffusion-weighted imaging, endovascular management of anterior falcotentorial dural arteriovenous fistulas, diffusion tensor imaging in migraine patients, deep learning in segmenting acute ischemic lesions, and computed...
