DEPARTMENT
Radiation Oncology

CLINICAL FOCUS

Dr. Erdoğan's areas of expertise include radiation therapy as a treatment for a range of cancers. Within this field, she has a particular interest in head and neck cancers, where radiation treatment is often planned in close coordination with other members of the oncology team, and in brain tumors, where treatment planning takes into account the location of the tumor and the surrounding structures.

In addition to external radiation treatment, Dr. Erdoğan's expertise covers brachytherapy, a form of radiation therapy in which a radiation source is placed inside or close to the area being treated. Whether brachytherapy, external radiation therapy or a combination is appropriate depends on the type and stage of the cancer, previous treatments and the individual patient's overall condition. Dr.
