CLINICAL FOCUS

A large part of Dr. Tutkun's clinical work involves the diagnosis and management of common dermatological conditions. These include acne treatment, fungal infections, genital herpes and the treatment of body and genital warts. She also treats excessive sweating.

Dr. Tutkun also offers a range of non-surgical aesthetic dermatology procedures. These include botulinum toxin applications, exosome applications, skin rejuvenation and regeneration, anti-aging treatments and non-surgical facial lifting. Before any aesthetic procedure, she reviews the patient's skin condition, medical history and expectations, and explains what a given treatment can and cannot address.

Fungal infections

INTERNATIONAL PATIENTS

Dr. Tutkun consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports before the visit, such as laboratory and pathology results, previous dermatology reports, notes on earlier treatments and discharge summaries, and arranges appointments and the hospital...
