CLINICAL FOCUS

Dr. Şimşek's clinical work centers on the diagnosis and treatment of gum disease. She sees patients with gum bleeding, gum abscesses, gum recession and tartar buildup, and she provides tartar removal and laser gum treatment where these are considered appropriate after examination.

In the field of gum aesthetics, Dr. Şimşek evaluates patients who are concerned about the appearance of their gums, including gummy smile, for which Botox is among the options she offers. Treatment choices depend on the individual examination findings and the patient's overall oral health, and are discussed with the patient before any...
