DEPARTMENT
Cardiovascular Surgery

CLINICAL FOCUS

Dr. Aydın's clinical work centers on the surgical and vascular management of conditions affecting the heart and blood vessels. He treats patients with aortic aneurysm, a condition in which a section of the aorta becomes enlarged and may require monitoring or repair depending on its size, location, and the patient's overall health.

In venous disease, Dr. Aydın provides varicose vein treatment and has published on endovenous closure for chronic venous insufficiency and on procedures for chronic iliofemoral venous occlusion.

Vascular surgery Varicose vein treatment Aortic aneurysm
Peripheral vascular occlusion Cardiovascular surgery

CONDITIONS TREATED

Peripheral vascular occlusion
