HOSPITAL

Acibadem Altunizade Hospital, İstanbul

DEPARTMENT

Dental & Oral Health

CLINICAL FOCUS

Dr. Sirkeci treats tooth-root infection and provides dental trauma treatment for children who have injured their teeth. She performs root canal treatment for both primary teeth and permanent teeth, an area in which the approach differs according to the stage of dental development.

A significant part of her practice is preventive. She carries out fluoride application and places fissure sealants to help protect the chewing surfaces of teeth, and she offers aesthetic pediatric dentistry for children whose teeth need restoration for appearance as well as function.

Space maintainers

Root canal treatment for primary teeth

Root canal treatment for permanent teeth

Dental treatment under general anesthesia

Fluoride application

INTERNATIONAL PATIENTS

Dr. Sirkeci speaks Turkish and English, so families arriving from abroad can communicate with her directly in either language, and interpreters can be arranged where another language is needed. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, panoramic images, previous treatment records and any...
