CLINICAL FOCUS

Emergency medicine is concerned with the initial assessment and management of patients whose condition requires prompt attention. In the Emergency Service, Dr. Kechagia sees patients across a broad range of presentations rather than a single organ system or age group.

For international visitors, an unexpected illness or injury away from home can be disorienting. Dr. Kechagia aims to explain what is being assessed, why particular tests are being requested and what the results mean, so that patients and the people accompanying them can follow each stage of the emergency visit.

INTERNATIONAL PATIENTS

Dr. Kechagia consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
