CLINICAL FOCUS

A significant part of Dr. Deniz's practice involves the nose and sinuses. She evaluates and treats sinusitis, including persistent or recurrent forms, and performs endoscopic sinus surgery when medical treatment has not provided adequate relief. The decision to operate is made after assessment of symptoms, examination findings and imaging.

Dr. Deniz also sees patients with hearing loss and performs inner ear surgery in selected cases, following clinical evaluation. Swallowing difficulty, or dysphagia, is assessed to identify its cause within the throat and upper airway before treatment is planned. Her expertise further extends to tongue cancer, where she takes part in diagnosis and treatment.

Sinusitis

Tonsillectomy

Tongue cancer

Dysphagia

Endoscopic sinus surgery

INTERNATIONAL PATIENTS

Dr. Deniz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as CT or MRI reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
