CLINICAL FOCUS

Dr. Semiz evaluates and manages hormonal and developmental conditions in children and adolescents. A central part of her practice is growth and puberty, including growth failure and short stature, growth and puberty disorders, and early puberty.

Her other areas of expertise include pediatric thyroid disorders, pediatric adrenal disorders, osteogenesis imperfecta and differences of sex development. Because many of these conditions develop over time, assessment typically relies on a careful history, growth records, clinical examination and laboratory or imaging findings, with...
