CLINICAL FOCUS

Dr. Göde's clinical practice is organized around three broad areas of ear, nose and throat medicine. The first is ear conditions, where his role includes taking a detailed history, examining the ear, reviewing any existing test results or imaging, and explaining what the findings mean for the patient.

In each of these areas, the emphasis is on a structured, stepwise approach. Not every patient will require a procedure; in many cases the first step is to clarify the diagnosis and to review what has already been tried. Where treatment is proposed, Dr. Göde discusses the expected course, the alternatives and the relevant considerations so that the patient can take part in the decision.
