Thyroid Diseases and Treatment

HOSPITAL
Acibadem Fulya Hospital, İstanbul

DEPARTMENT
Internal Medicine

CLINICAL FOCUS

Thyroid diseases form a central part of Dr. Özdemir's practice. He evaluates and manages patients with thyroid disease and follows their treatment over time, since many thyroid conditions require ongoing monitoring and dose adjustment rather than a single intervention.

Dr. Özdemir also sees patients with other common internal medicine problems. These include anemia, where identifying the underlying cause guides treatment; edema, which may point to a number of different underlying conditions and requires careful clinical evaluation; and digestive complaints such as gastritis and gastroenteritis.

Anemia

Gastroenteritis

Diagnosis and Treatment of Metabolic Diseases

Obesity

Edema

INTERNATIONAL PATIENTS

Dr. Özdemir consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example ultrasound, MRI or CT reports, laboratory and pathology results, operative notes and discharge...
