CLINICAL FOCUS

Within the Emergency Service, Dr. Cici sees patients presenting with injuries and acute conditions that require prompt evaluation. Trauma is a central part of his practice. This includes the initial assessment of injured patients, identification of injuries that may need urgent attention and coordination of further care where this is required.

His areas of expertise include bee stings and tick bites, which may cause local reactions or, in some cases, more significant systemic responses that call for medical evaluation. Drowning and acute hypoxia, in which the body's tissues receive insufficient oxygen, are also within his clinical focus, as is airway obstruction, where the passage of air to the lungs is partly or completely blocked.

INTERNATIONAL PATIENTS

Dr. Cici consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. For planned visits and non-urgent questions, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and...
