DEPARTMENT
Neurosurgery

CLINICAL FOCUS

A substantial part of Dr. İşlekel's work is in pediatric neurosurgery. He evaluates and treats children with pediatric brain tumors, pediatric epilepsy and pediatric spasticity. For selected children whose seizures do not respond adequately to medication, epilepsy surgery may be considered after a detailed pre-surgical assessment.

In adults, Dr. İşlekel treats brain tumors, cerebral aneurysms and brain hemorrhage, and he performs surgery for epilepsy and deep brain stimulation in appropriately selected patients. His spinal practice includes back, neck and spinal pain, disc herniation and spinal hypolordosis.

INTERNATIONAL PATIENTS

Dr. İşlekel consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging — for example MRI or CT reports, laboratory and pathology results, operative notes and discharge summaries — and arranges appointments and the hospital visit.
