Ophthalmology

CLINICAL FOCUS

A large part of Dr. Tekin's practice involves the assessment and management of refractive errors. She evaluates patients with myopia, hyperopia and astigmatism, and discusses the correction options that may be appropriate for the individual patient's eyes, age and visual needs.

Dr. Tekin also sees patients with conditions affecting the surface of the eye and the eyelids, including conjunctivitis and blepharitis. In children, she assesses paediatric eye diseases and amblyopia, a condition in which one eye develops weaker vision than the other.
