DEPARTMENT

Physical Medicine & Rehabilitation

CLINICAL FOCUS

The areas of expertise listed for Sevgi Nama are physical medicine and rehabilitation, rehabilitation care, functional recovery, and treatment planning. In practice, this means she takes part in assessing a patient's current level of function, identifying limitations in movement, strength or daily activity, and contributing to a rehabilitation plan that is adapted to the individual patient.

Treatment planning in rehabilitation usually involves close coordination with the physicians and other members of the care team, so that the exercises and therapeutic measures used are consistent with the overall medical treatment. Functional recovery is a gradual process, and the pace and extent of improvement depend on the underlying condition, the patient's general health and the consistency with which the program is...

INTERNATIONAL PATIENTS

Sevgi Nama consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges the appointments and the hospital...
