CLINICAL FOCUS

Dr. Selen evaluates and follows up women with a range of gynecological concerns. These include menstrual irregularities, premenstrual syndrome (PMS), painful periods and pelvic pain. She also sees patients with painful intercourse (dyspareunia) and provides sexual dysfunction treatment, an area in which sexual health concerns are assessed within a broader gynecological evaluation.

In addition, Dr. Selen provides care for sexually transmitted infections and HPV-related concerns. Her areas of expertise also cover conditions related to cervical cancer and ovarian cancer, for which she offers evaluation and follow-up. Pregnancy follow-up and childbirth are also part of her practice.

Menstrual irregularities

Premenstrual syndrome (PMS)

Painful periods

Painful intercourse (dyspareunia)

Sexual dysfunction treatment

INTERNATIONAL PATIENTS

Dr. Selen speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. The international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit.
