Service

CLINICAL FOCUS

Dr. Ertuğrul's clinical focus is psychological counseling. Counseling sessions offer a setting in which patients can talk through emotional difficulties, stress, or concerns related to their health and daily life, and work toward a clearer understanding of their situation.

She also provides evidence-based psychotherapy, meaning therapeutic approaches that are grounded in published research and clinical guidelines rather than on untested methods. Alongside this, she offers individualized psychological therapy, in which the assessment, goals, and techniques are tailored to the person rather than following a fixed program.
