CLINICAL FOCUS

A large part of Dr. Aslan's surgical work concerns the nose and sinuses. He treats nasal deviation and performs septoplasty to correct a deviated septum, as well as rhinoplasty and septorhinoplasty, in which correction of the septum is combined with reshaping of the external nose.

His ear-related practice includes middle ear surgery, prominent ear correction and adenoid treatment. He also evaluates patients with hoarseness and with vertigo, where a careful history and examination are used to distinguish between the possible causes before any treatment is considered. In head and neck surgery, Dr.
