CLINICAL FOCUS

The medical unit recorded for Dr. Topbaş is Ophthalmology, the field of medicine concerned with the examination, diagnosis and treatment of disorders of the eye and the visual system. The available profile does not list specific conditions, surgical procedures or subspecialty interests, and this page does not attribute particular treatments to Dr. Topbaş. Whether a given eye condition or procedure falls within Dr.

As is generally the case in ophthalmology, decisions about examination, further testing and treatment depend on the individual patient's findings. Any recommendation follows a clinical assessment rather than a predetermined plan, and the possible options, their limitations and the need for follow-up are discussed with the patient.

INTERNATIONAL PATIENTS

Dr. Topbaş speaks Turkish and English, and interpreters can be arranged for patients who prefer to communicate in another language. The Acibadem international patient team coordinates the collection of prior reports and imaging, arranges appointments and organises the hospital visit, so that relevant documents are available to the doctor before the patient arrives.
