DEPARTMENT
Pediatrics

CLINICAL FOCUS

Dr. Cüneydi's work centers on child and adolescent health from the newborn period onward. She provides newborn follow-up and well-child follow-up, including childhood vaccinations, and monitors growth over time so that growth disorders in children can be identified and assessed.

A further part of her practice concerns nutrition and feeding in early life. She evaluates pediatric nutritional disorders and iron deficiency and anemia in children, and she sees infants with feeding-related complaints such as lactose intolerance in infants and infant colic.
