Orthopedics & Joint Center

CLINICAL FOCUS

Dr. Sarban evaluates and treats a range of conditions affecting the joints and the musculoskeletal system. These include osteoarthritis and osteoporosis, as well as sports injuries and sports traumatology, such as meniscus tears, cruciate ligament tears and muscle tears.

Joint replacement is a central part of his practice. He performs hip replacement and knee replacement surgery, and robotic surgery is among his subspecialty areas. Whether surgery is appropriate, and which approach is suitable, depends on the individual patient's condition, imaging findings and overall health, and is discussed with the...
