CLINICAL FOCUS

Emergency medicine covers the initial assessment and management of patients whose condition is acute or may change quickly. Within this field, Dr. Islamova's profile lists emergency interventions and trauma, which involve evaluating an injured or acutely unwell patient, identifying conditions that need prompt attention and coordinating...

Her expertise list also includes several conditions that affect breathing or arise from environmental exposure. Airway obstruction and acute hypoxia are situations in which the supply of oxygen to the body is compromised and which require rapid recognition.
