HOSPITAL

Acibadem Altunizade
Hospital, İstanbul

DEPARTMENT

Inpatient Clinic Physicians

CLINICAL FOCUS

Dr. Amoudi's clinical work concentrates on inpatient medical care. This begins with hospital patient assessment: reviewing the reason for admission, the patient's history and current symptoms, and the results of examinations and tests that have already been performed.

A further element of her work is care coordination. Admitted patients often receive input from several teams, and Dr. Amoudi helps to bring together the information from these teams so that the medical plan remains consistent and clearly communicated. She also provides recovery support, monitoring patients as they move from active treatment toward discharge and helping to prepare them for the next phase of their care.

Care coordination

INTERNATIONAL PATIENTS

Dr. Amoudi consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a hospital visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments...
