CLINICAL FOCUS

Dr. Başı's clinical work is in oral and dental health. Patients typically come to the unit for a general dental assessment, for the evaluation of specific complaints, or for a second opinion on dental treatment that has already been proposed or started elsewhere.

For patients who wish to read about dental treatments described on this site before their visit, information is available on E-Max Crowns, Composite Bonding, Laminate Veneers and Full Mouth Reconstruction. Whether any of these options is appropriate for an individual patient can only be determined after a clinical examination, and the possible benefits and limitations of each approach are discussed during the consultation.

INTERNATIONAL PATIENTS

Dr. Başı consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before the visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as dental X-rays, CT reports, previous treatment records and discharge summaries, and arranges appointments and the hospital visit.
