CLINICAL FOCUS

A central part of Sila Çelebi's work is childhood hearing loss. Hearing assessment in children requires methods suited to the child's age and ability to cooperate, and her listed expertise covers the testing used to identify and characterize hearing loss in this group.

Her testing expertise includes audiometry, which measures how a person responds to sounds of different frequencies and intensities, and BERA (ABR) testing, an objective method that records the auditory pathway's response to sound and does not depend on the patient actively responding. BERA (ABR) testing is relevant where behavioral testing is difficult, including in infants and young children.

INTERNATIONAL PATIENTS

Sıla Çelebi speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports, including any previous hearing test results, imaging reports such as MRI or CT, laboratory results, and discharge summaries, and it arranges appointments and organises the...
