CLINICAL FOCUS

Dr. Ratip evaluates and treats adults with malignant and non-malignant hematologic conditions. Her areas of expertise include acute lymphoblastic leukemia (ALL), acute myeloid leukemia (AML) and chronic myeloid leukemia (CML), multiple myeloma and other bone marrow disorders.

Within the Bone Marrow Transplant Unit – Adult, she assesses patients for bone marrow transplantation and for cellular therapies, including CAR T-cell therapy. Whether such treatments are suitable depends on the specific disease, its stage, prior therapy and the patient's general condition, and this is determined on a case-by-case basis...

Bone marrow transplantation

Acute lymphoblastic leukemia (ALL)

Acute myeloid leukemia (AML)

Cellular therapies

CAR T-cell therapy

CONDITIONS TREATED

Acute lymphoblastic leukemia (ALL)

Acute myeloid leukemia (AML)

Bone marrow disorders

Childhood leukemia

Hairy cell leukemia
