İstanbul

DEPARTMENT
Orthopedics & Joint Center

CLINICAL FOCUS

Joint replacement forms a central part of Dr. Baştürk's work. He evaluates patients with hip and knee conditions in which conservative measures have not provided sufficient relief and discusses whether hip replacement or knee replacement may be appropriate. In selected knee cases, robotic knee surgery is among the options considered.

His practice also covers sports medicine and the treatment of sports-related and traumatic injuries of the knee, including cruciate ligament tears, as well as trauma more broadly. In foot and ankle surgery, Dr. Baştürk assesses and treats conditions such as flatfoot (pes planus) and performs deformity surgery where correction is indicated.

INTERNATIONAL PATIENTS

Dr. Baştürk consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital visit.
