Hospital, İstanbul

DEPARTMENT
Dental & Oral Health

CLINICAL FOCUS

Dr. Eğilmez's work is centred on general dental care. Preventive dentistry and oral health maintenance involve regular examinations, identifying early signs of dental or gum problems and advising patients on how to protect their teeth and gums over time.

Dental treatment planning is a further part of her practice. This means assessing a patient's overall oral condition, discussing the findings and setting out the possible steps and their order, so that the patient understands what is being proposed and why.

INTERNATIONAL PATIENTS

Dr. Eğilmez speaks Turkish and English, so a patient travelling from abroad can be understood in either language, and interpreters can be arranged for other languages. The international patient team coordinates the collection of prior reports and imaging, for example dental X-rays, previous treatment records and laboratory results, arranges appointments and organises the hospital visit.

CONDITIONS TREATED

Routine dental care Comprehensive oral care
