Otorhinolaryngology (ENT)

CLINICAL FOCUS

In head and neck surgery, Dr. Bilici evaluates and treats patients with oral cancer, laryngeal cancer, and tongue and tongue base cancer. The assessment of these conditions generally relies on clinical examination, imaging and pathology results, and the treatment approach is decided individually according to the location and extent of...

His nasal and airway work includes septoplasty, septorhinoplasty and rhinoplasty, as well as the evaluation of snoring. He also performs tonsillectomy and sees patients with hoarseness, hearing loss and tinnitus.
