CLINICAL FOCUS

Dr. Sevgen's clinical focus is emergency medicine. He assesses patients presenting with trauma, from injuries after falls and accidents to other acute physical harm, with attention to prompt evaluation and stabilization. A further area of his work is environmental emergencies.

In emergency care, the initial evaluation typically involves a rapid assessment of vital signs, breathing and circulation, followed by a focused examination and any imaging or laboratory tests judged necessary. The appropriate course of action depends on the individual patient's presentation and overall condition, and Dr. Sevgen discusses findings and next steps with the patient or their companions as the situation allows.

Bee stings

INTERNATIONAL PATIENTS

Dr. Sevgen consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. The Acibadem international patient team coordinates the collection of prior medical reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
