CLINICAL FOCUS

A substantial part of Dr. Aydın's practice is restorative dentistry. He performs root canal treatment for teeth with infected or inflamed pulp, places dental fillings to repair decayed or damaged teeth, and carries out tooth extraction when a tooth cannot be preserved. For missing teeth, he offers dental implants and restorations in porcelain and zirconia.

In aesthetic dentistry, Dr. Aydın works with laminate veneers, composite bonding and teeth whitening. The choice between these options depends on the condition of the existing teeth, the extent of any discoloration or wear, and the patient's expectations.

Porcelain dental restorations

Laminate veneers

Zirconia dental restorations

INTERNATIONAL PATIENTS

Dr. Aydın consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before the visit, the Acibadem international patient team coordinates the collection of prior dental reports and imaging, such as X-ray or CT reports and records of previous treatments, and arranges appointments and the hospital visit.
