CLINICAL FOCUS

Dr. Büber's practice covers clinical biochemistry, laboratory testing and diagnostic laboratory support. In this role he is involved in the analysis and interpretation of laboratory results that treating physicians use when evaluating a patient's condition, planning further investigations or monitoring the course of treatment.

He has also contributed to published research in biochemistry. His co-authored papers include studies on adenosine deaminase and dipeptidyl peptidase-IV activities in cancerous and non-cancerous human gastric and colon tissues, on the effects of aqueous plant extracts and static magnetic fields on enzyme activity and oxidant/antioxidant...
