Hospital, Muğla

DEPARTMENT
Gynecology & Obstetrics

CLINICAL FOCUS

Dr. Ateş evaluates and treats a range of gynecological conditions. These include pelvic pain, menstrual disorders, premenstrual syndrome, painful menstruation and painful intercourse. He manages endometriosis, ectopic pregnancy, Bartholin cyst, sexually transmitted infections and postpartum fever.

In reproductive medicine, he assesses infertility, drawing on his training in in vitro fertilization, laparoscopy, hysteroscopy, gynecological microsurgery and male infertility. Treatment planning is based on the individual patient's symptoms, examination findings, prior results and reproductive goals;

Pelvic pain treatment

Menstrual disorders

Premenstrual syndrome

Painful menstruation

Painful intercourse
