HOSPITAL
Acibadem Bursa Hospital

DEPARTMENT
Cardiovascular Surgery

CLINICAL FOCUS

A substantial part of Dr. Turan's work concerns congenital heart disease, including ventricular septal defect (VSD), and pediatric cardiovascular surgery. In adult patients he treats heart valve disease, including aortic valve stenosis, as well as aortic aneurysm and other major vessel disorders.

Dr. Turan also performs robotic surgery, including robotic bypass surgery, where a robot-assisted approach is considered appropriate for the patient. Cardiopulmonary rehabilitation forms a further part of his practice, supporting recovery of heart and lung function after cardiac procedures.
