CLINICAL FOCUS

Dr. Arpacı's areas of expertise span the main cross-sectional and functional imaging methods: computed tomography, magnetic resonance imaging, ultrasound imaging and scintigraphy. In breast imaging, he performs and interprets mammography and evaluates breast diseases.

In Interventional Radiology and Interventional Neuroradiology, Dr. Arpacı carries out image-guided procedures. One of the procedures listed among his areas of expertise is transarterial radioembolization (TARE), an image-guided treatment in which radioactive material is delivered through the arteries supplying a target area.
