CLINICAL FOCUS

A central part of Dr. Çubukcuoğlu's clinical work is the care of metabolic and endocrine conditions. He evaluates and manages type 1 diabetes, type 2 diabetes, and prediabetes, and he treats patients with obesity, where the approach is adapted to the individual's history and goals of treatment.

In the digestive field, he treats Crohn's disease and colitis as well as chronic pancreatitis. He also sees patients with anemia and Behçet's disease. In addition, he provides chronic disease management and geriatric health care for older patients whose conditions call for ongoing monitoring, review of medications, and coordination of care over time.

INTERNATIONAL PATIENTS

Dr. Çubukcuoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and...
