DEPARTMENT
Ophthalmology

CLINICAL FOCUS

Dr. Ormancıoğlu's clinical work is in ophthalmology, the medical specialty concerned with the eyes and vision. Within the Ophthalmology unit he provides care for patients with eye conditions, and his consultations are informed by his medical education and his specialist training in ophthalmology.

Patients considering a consultation should be aware that the scope of care in an individual case is determined at the appointment itself rather than in advance. Dr. Ormancıoğlu reviews the information available, including reports and previous treatments, discusses the findings with the patient and outlines the options that may be considered.

INTERNATIONAL PATIENTS

Dr. Ormancıoğlu consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the hospital...
