HOSPITAL
Acibadem Atakent
Hospital, İstanbul

DEPARTMENT
Organ Transplantation

CLINICAL FOCUS

A central part of Dr. Yılmaz's practice is organ transplantation. He evaluates and treats patients who may be candidates for kidney transplantation, and he is also involved in liver transplantation for patients with liver failure. Transplant candidacy and timing are discussed within the Organ Transplantation unit on the basis of each patient's individual clinical picture.

Where appropriate, Dr. Yılmaz uses robotic surgery techniques. His endocrine surgery practice covers thyroid conditions, and he also treats hernias. In proctology, he offers evaluation and treatment of hemorrhoids and other anorectal diseases.

Kidney transplantation

Liver transplantation

Pancreatic diseases

Liver and biliary tract diseases

Fatty liver disease

INTERNATIONAL PATIENTS

Dr. Yılmaz consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge...
