CLINICAL FOCUS

A central part of Dr. Kaya's practice is root canal treatment, including root canal retreatment for teeth in which an earlier procedure has not resolved the problem, and the management of dental root infection. Patients presenting with toothache are assessed to identify the underlying cause before a treatment plan is discussed. Dr.

Teeth grinding treatment is another area of expertise. Options that may be considered include night guards for teeth grinding and Botox for teeth grinding; the choice depends on the individual assessment. Dr.
