Neurology

CLINICAL FOCUS

A substantial part of Dr. Gültekin's work concerns movement disorders. She evaluates and treats patients with Parkinson's disease and essential tremor, conditions in which a detailed history and a careful clinical examination are central to reaching a diagnosis and choosing a treatment plan. Information on the approach to these conditions is available on the movement disorders treatment and tremor treatment pages of this site.

She also sees patients with cognitive complaints, including memory loss, Alzheimer's disease and other forms of dementia, where the aim is to clarify the cause of the symptoms and to discuss the treatment and support options that may be appropriate. Headache and migraine are a further part of her practice, alongside dizziness. In the field of stroke and preventive treatments, Dr.

Essential tremor Migraine Stroke prevention
Movement disorders Memory loss

INTERNATIONAL PATIENTS

Dr. Gültekin speaks Turkish and English, and interpreters can be arranged for patients who communicate in another language. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, for example MRI or CT reports, laboratory results, previous consultation notes and discharge summaries, and arranges appointments and the hospital visit...
