DEPARTMENT
Bariatric & Metabolic Surgery

CLINICAL FOCUS

Within general surgery, Dr. Bilecik assesses patients who may need surgical treatment, reviews their existing findings and discusses whether an operation is appropriate in their particular situation. Surgical planning is based on the patient's history, clinical examination and available imaging and laboratory results, and the decision to operate is made together with the patient after the options, expected course and possible...

His subspecialty area is obesity surgery, which he practises as part of the Bariatric & Metabolic Surgery unit. Candidates for obesity treatment are evaluated on an individual basis. This evaluation considers the patient's medical history, current health status and previous attempts at weight management before any surgical option is discussed.

INTERNATIONAL PATIENTS

Dr. Bilecik consults in Turkish and English, and interpreters can be arranged for patients who prefer another language. Before a visit, the hospital's international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries, and arranges appointments and the...
