HOSPITAL
Acibadem Atasehir Hospital, İstanbul

DEPARTMENT
Bariatric & Metabolic Surgery

CLINICAL FOCUS

A significant part of Dr. Yıldırım's work concerns diseases of the breast. He evaluates and treats benign breast conditions and performs breast cancer surgery. The surgical management of each patient depends on the findings of clinical examination, imaging and pathology, and the options are reviewed individually.

In line with his subspecialty interests, Dr. Yıldırım performs obesity surgery and uses robotic surgery in suitable cases. Whether a patient is a candidate for a bariatric or robotic procedure is decided after an assessment of the individual's medical history and current condition.

Umbilical hernia repair Inguinal hernia repair

INTERNATIONAL PATIENTS

Dr. Yıldırım consults in Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging, such as MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and...
