Dental & Oral Health

CLINICAL FOCUS

Dr. Subaşıoğlu assesses and treats conditions of the gums and surrounding tissues. These include gingivitis, gum bleeding, gum enlargement, gum abscess, oral sores and bad breath, which can be related to gum inflammation or other oral causes.

Her work also covers general dental procedures. She places dental implants, performs tooth extraction and provides dental fillings. In addition, she carries out gum aesthetics procedures for patients concerned about the appearance of the gum line. Whether a particular procedure is appropriate is determined individually after examination.
