DEPARTMENT
Gastroenterology

CLINICAL FOCUS

Dr. Egesel evaluates and treats a range of conditions of the upper and lower gastrointestinal tract. These include Barrett's esophagus, celiac disease, and the inflammatory bowel diseases Crohn's disease and ulcerative colitis. He also sees patients with colorectal cancers. Liver diseases, including fatty liver disease, as well as pancreatic diseases and biliary tract diseases, are further areas of his practice.

On the procedural side, Dr. Egesel performs gastroscopy and colonoscopy, which allow direct examination of the esophagus, stomach and colon and the taking of tissue samples where needed. He performs ERCP, an endoscopic technique used in the diagnosis and management of biliary and pancreatic conditions, and the balloon dilation procedure, which is used to widen narrowed segments of the digestive tract.

ERCP

INTERNATIONAL PATIENTS

Dr. Egesel speaks Turkish and English, and interpreters can be arranged for patients who speak other languages. Before a visit, the Acibadem international patient team coordinates the collection of prior reports and imaging — for example MRI, CT, X-ray or ultrasound reports, laboratory and pathology results, operative notes and discharge summaries — and arranges appointments and the...
